

SMILE

SHARE THE MUSIC FOR INCLUSIVE EDUCATION

ABOUT SMILE

SMILE project aims to:

- Provide teachers with a practical framework and examples of best practice to assist them in meeting the challenges of inclusion and diversity in education.
- Provide teachers of preprimary/ primary schools new knowledge, key competences and ready to use educational material to effectively use music as a didactic and pedagogical tool for inclusive education.
- Allow teachers to develop social and digital skills by using the repository and the online training.
- The SMILE project will create a digital repository with material and activities based on music, that could be used during the integration of music in teaching multicultural students, in terms of inclusion education.

The project work program is conceived for the effective achievement of the following outputs:

PR1 - Need Analysis Survey

A transnational survey on teachers' attitudes towards the use of music as a tool for inclusive education and the classification of needs for the material to be developed during the project.

PR2 - Digital Repository

A digital repository of songs, activities, methods and examples that can be used as an educational tool for inclusive education. The repository will also include activities, instructions, lesson plans, and music techniques that will help teachers effectively integrate music into their daily teaching.

PR3 - Teacher's Guide

A guide including research on the relevance and importance of music in intercultural learning and inclusive education. It will include information on inclusive education and methods of integrating music into formal and non-formal education.

PR4 - SMILE MOOC

The development of an online education designed as a MOOC, giving the opportunity to more teachers, from Europe and beyond, to be trained on how to use music in classrooms, in terms of inclusive education.
